

Australian Government

BUILDING OUR FUTURE

Signage Guidelines

Department of Infrastructure, Transport, Regional Development and Communications

January 2021

This document sets out the guidelines for signage relating to projects funded through the Department of Infrastructure, Transport, Regional Development and Communications.

For all enquiries regarding signage or to request Australian Government Building our Future signage templates please contact events@infrastructure.gov.au.

Commemorative plaque:	
Project jointly funded by the Australian Government	31

The following requirements relate to all signage for projects funded through the Department of Infrastructure, Transport, Regional Development and Communications.

For other components of project funding or grants, recipients should refer to the relevant agreement, conditions and/or guidelines. On major road and rail construction projects, a project specific sign is to be placed prior to construction commencing at each end of the physical work, facing oncoming traffic. Please ensure consideration is given to safety issues surrounding the placement of signs.

All other signs need to be placed in close proximity to project works.

Signs are not to be obscured, including by any other information signs and must be maintained for 12 months beyond the opening of the project.

Where a project is fully funded by the Australian Government, no signs should give public recognition to the relevant state/territory government or authority other than an auxiliary sign affixed below the main project sign. See auxiliary sign page 6.

Where a project is majority funded (80 per cent or more Australian Government funded), the Australian Government Crest is to be placed at the left-hand side of the branding block, with the relevant state/territory government or authority logo affixed below the project name on the sign.

Where a project is jointly funded (up to 79 per cent Australian Government funded), the Australian Government Crest is to be placed at the left-hand side of the branding block, with the relevant state/territory government or authority logo on the adjacent side.

The requirements are set out in the templates in this document.

The Australian Government commemorative plaque has been designed for unveiling at official Australian Government events.

All pre-existing signage remains in place.

Funding recipients are required to submit proofs of signs where indicated in the following pages. Please ensure your manufacturing timetable deadlines include sufficient time for comment and approvals from the department (five working days may be required).

The funding recipient will be required to submit final proofs of signs and commemorative plaques to the relevant project officer within the Department of Infrastructure, Transport, Regional Development and Communications for clearance prior to production. Sign sizes, text sizes, style, colour and materials should be in accordance with the examples outlined in this document. A package of digital templates is available on request by emailing events@infrastructure.gov.au.

Size

For national road and rail projects the sign may be one of two sizes according to the visibility requirements of the site:

- 3000mm wide by 1600mm high for major projects in open road locations; or
- 2000mm wide by 1400mm high for locations where physical space is limited.

For all other projects the sign should be:

- 900mm wide by 1200mm high for programs in open road locations; or
- 600mm wide by 900mm high for locations when the usual speed limit is less than 80km per hour or where physical space is limited.

Commemorative plaques should be:

- 297mm wide by 210mm high.

Colour

Colour for all reproduction methods must be matched as closely as possible to the Pantone standards. Allowances should be made for variations between materials.

Colour specifications:

	C 85%		C 0%
	M 52%		M 0%
	Y 10%		Y 0%
PMS 285	K 0%	Black	K 100%

Fonts

ABCabc123

Primary sans serif typeface – Arial Black

ABCabc123

Primary sans serif typeface – Arial Bold

Digital file templates

The following digital files (InDesign, eps and pdf) are available from the Department of Infrastructure, Transport, Regional Development and Communications via events@infrastructure.gov.au

For national road and rail projects:

- 3000mm wide by 1600mm high for major projects in open road locations; or
- 2000mm wide by 1400mm high for locations where physical space is limited.

For all other projects:

- 900mm wide by 1200mm high for programs in open road locations; or
- 600mm wide by 900mm high for locations when the usual speed limit is less than 80km per hour or where physical space is limited

For commemorative plaques:

- 297mm wide by 210mm high

Manufacturing specifications

Signs

The below specifications have been developed to ensure signage lasts and can be cleaned if defaced. These specifications are a guide only. You may choose other options depending on advice given from your manufacturer.

Aluminium thickness: 1.6mm Aluminium (standard for signage).

Mounting: RTA RIB (standard RTA mount).

Stock: NON REFLECTIVE – non reflective vinyl (does not take in any light).

Finishing: DIGITAL PRINT OVER LAMINATION – clear (durability). ANTI-GRAFFITI Coating (allows for graffiti to be removed with alcohol).

Commemorative plaque

Please contact a plaque manufacturer for advice on plaque production specifications.

Map specifications

It is expected that road users will be made aware of the project work underway in the area through each stage of travel. Diagrams depicting the works should be simplified line art as per example.

Legend

Upgraded route:	
Original route:	
Project start and finish:	
Location of town:	
Bridge:	 
Creek/River:	

Fonts

ABCabc123

Primary sans serif typeface – Arial Bold.

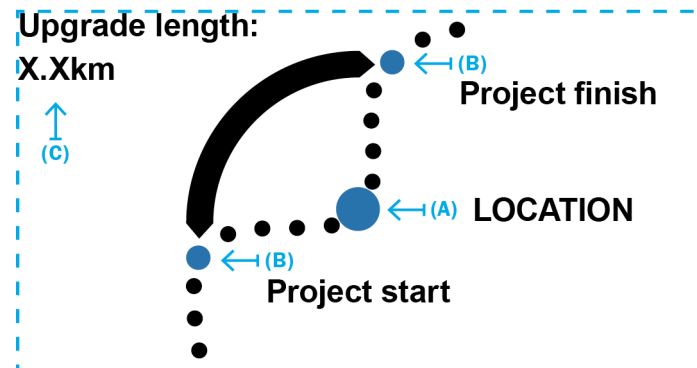

Project signs should not be overcrowded.

The name of the location should be shown in black upper case letters on a white panel, see (A).

The start and finish of works should be shown in sentence case white on black, see (B).

Upgrade length in excess of 1 km must be indicated top left of map, as per (C).

Example of application

Multiple logo applications

Where a project is jointly funded, the Australian Government Crest is to be placed at the left-hand side of the branding block, with the relevant state/territory government or authority logo on the adjacent side.

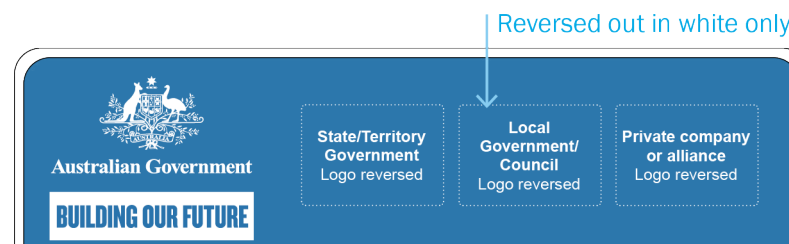

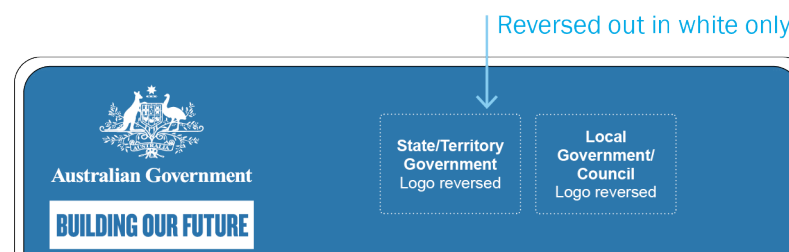

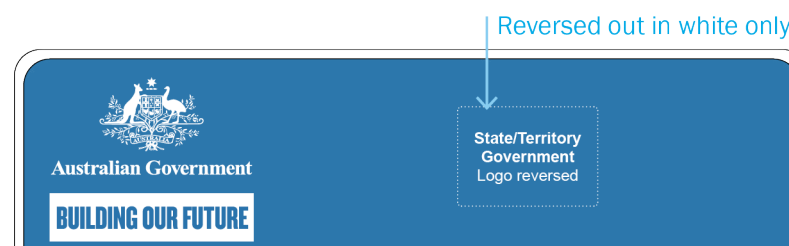

Signs using more than one logo are required to be branded in the following order:

1. Australian Government Crest and 'BUILDING OUR FUTURE' tag line
2. State/Territory Government logo
3. Local Government/Council logo
4. Private company or alliance.

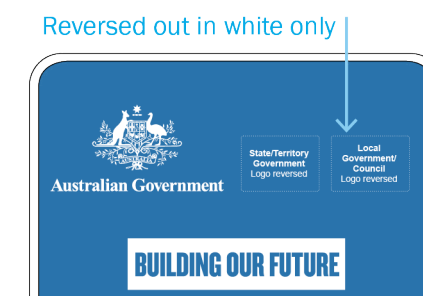

The Australian Government Crest and 'BUILDING OUR FUTURE' tag line, should always take prominence over all other logos.

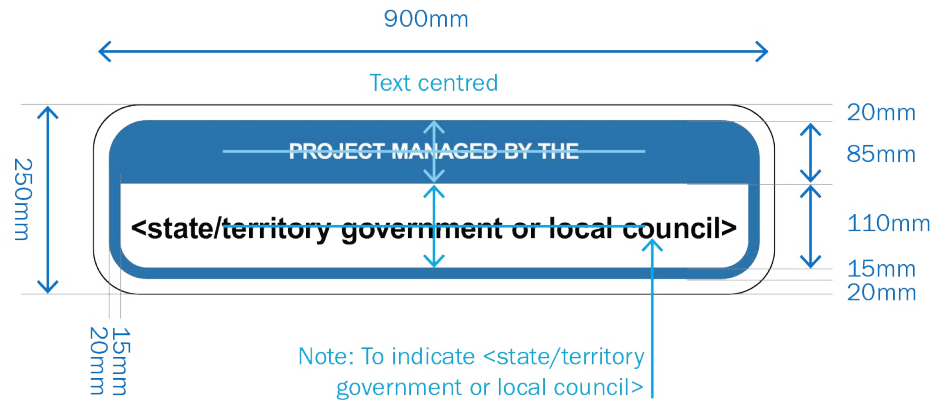

Suggested logo placements are examples only. Please ensure logos look balanced in size and position within the space provided. All logos must be reversed out in white on the blue background as shown in these examples.

Example of application on 3000mm wide by 1600mm high sign

Example of application on 900mm wide by 1200mm wide sign

Example of application

Auxiliary sign specifications

Where a project is fully funded by the Australian Government, there are to be no signs giving public recognition to the relevant state/territory government or authority other than an auxiliary sign affixed below the main project sign.

The relevant state/territory government or local council can produce their auxiliary sign.

The auxiliary sign will be of the same width and approximately $\frac{1}{3}$ height of the main panel.

Text should read "PROJECT MANAGED BY THE <state/territory government or local council>" and only contain text.

Commemorative plaque: Projects jointly funded by the Australian Government

The Australian Government commemorative plaque has been designed for unveiling at official Australian Government events.

Key considerations for jointly funded plaques:

- Only funding partners receive recognition on the plaque (excludes in-kind contributions).
- Only the logos of funding partners are to appear in the designated logo section and in the order shown.
- Only one designated funding partner official shall have their name and title appear on the plaque and shall officiate at the event.
- The plaque template is not to be altered to include any additional text or graphics.
